

# Poliform

Our company has been operating in the production of furnishing systems and accessories for every area of the house (bookcases, containers, wardrobes, beds, kitchens and upholstered furniture) since 1970.

Our commitment to a continuous improvement of the environmental performance in relation to the production process stems from the awareness of:

- the need to work in full compliance with the applicable environmental legislation;
- the importance, within the current socio-economic context, of governing every production process, focusing on reducing the associated environmental impacts;
- the growing attention of customers and the community towards protection of the environment.

In this perspective, our everyday work focuses on satisfying the explicit and implicit requests of our customers and of other interested parties, through an analysis of their needs and expectations and of the context in which we operate, a process management that places us at the top of our sector, whilst simultaneously ensuring the greatest attention to all environmental issues.

Our objectives are:

- to reduce, as far as is technically and economically feasible, the environmental impact of our processes, starting from using environmentally friendly raw materials which are of a safe and certified provenance;
- to carry out the processes with a view to constant attention and progressive rationalisation of energy and raw material consumption;
- to maintain a relationship of transparency, dialogue and availability with all stakeholders, including employees, local communities, customers, suppliers and regulatory Bodies;
- to contribute to a growing awareness by customers, suppliers and other interested parties in relation to environmental issues through an activity which, whilst providing high quality products, involves all subjects in an information process concerning the environmental topics involved.

We are committed to sharing this policy with all our employees and with those who work on our behalf and to making it available to the public.
