Fascia zoccolo di serie

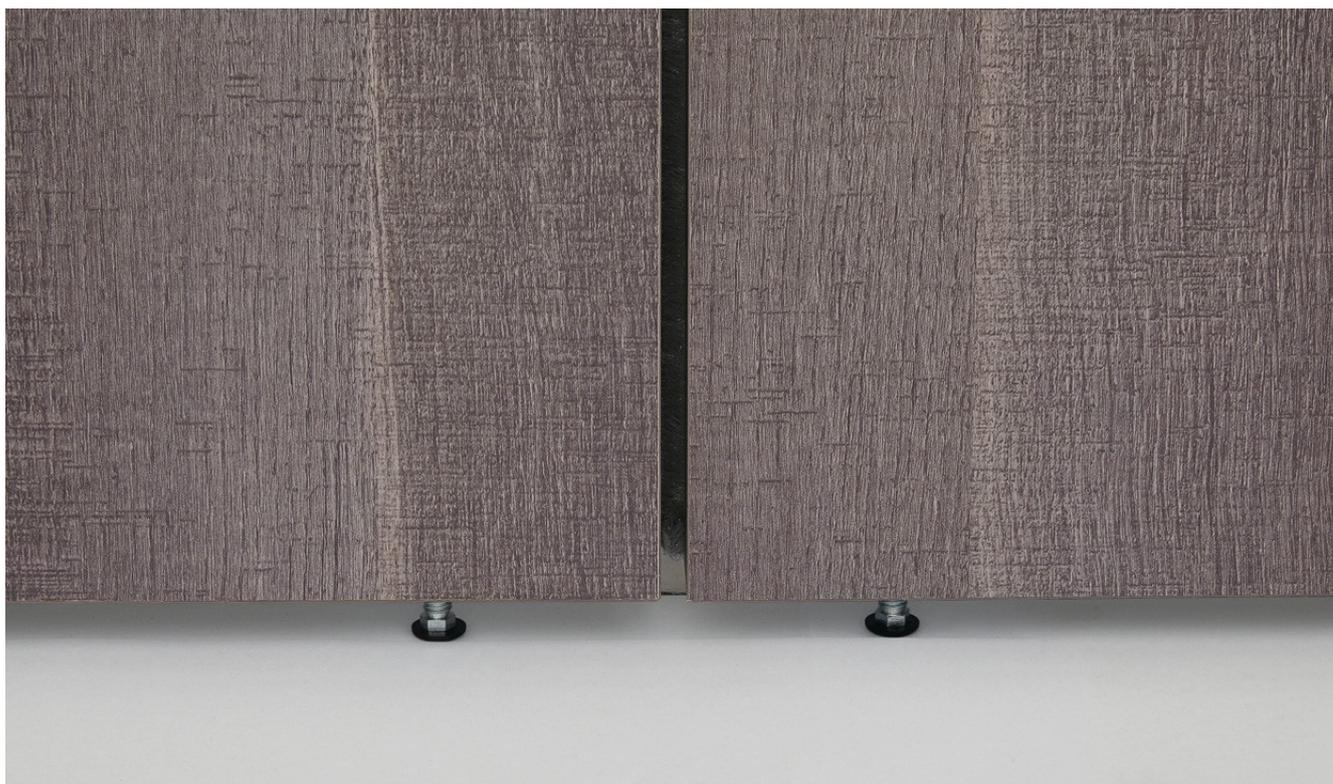

Verniciato opaco ardesia o champagne, altezza mm 37.

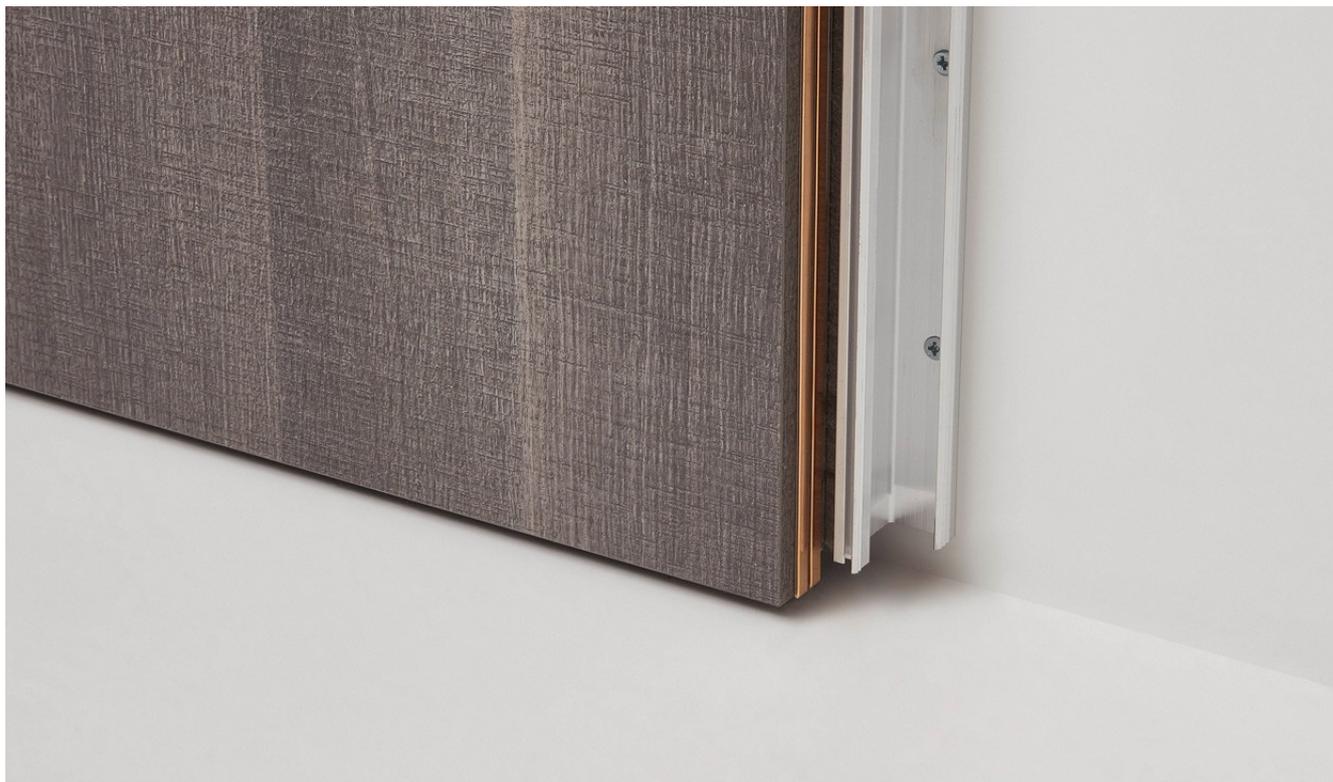

Fascia zoccolo opzionale

Verniciato opaco ardesia o champagne, altezza mm 72.

L'installazione perfetta di ogni cabina armadio è garantita dalla possibilità di livellare ogni singolo pannello schienale tramite i piedini regolabili.

Per cabine armadio con schienale. La cremagliera consente il fissaggio a muro dei pannelli schienale e l'aggancio delle attrezzature.

Profilo terminale

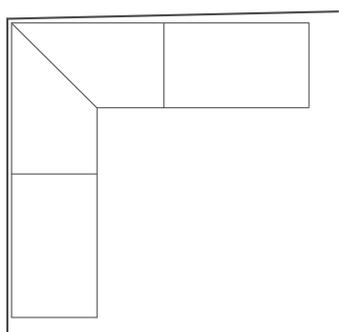

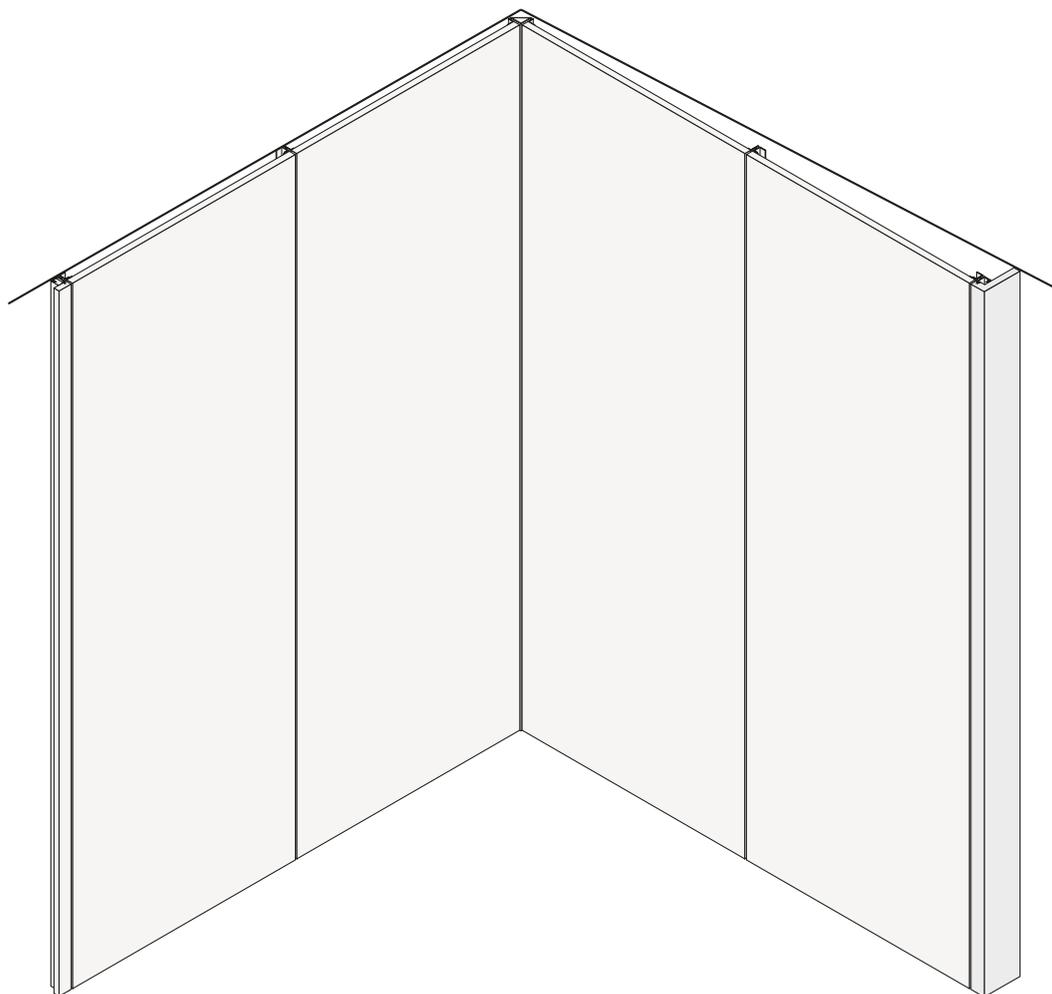

Per cabine armadio con schienale. Il profilo conclude la pannellatura schienale lateralmente, disponibile in nobilitato 7 finiture, metacrilato roller 2 finiture o nobilitato skin laccato opaco colori.

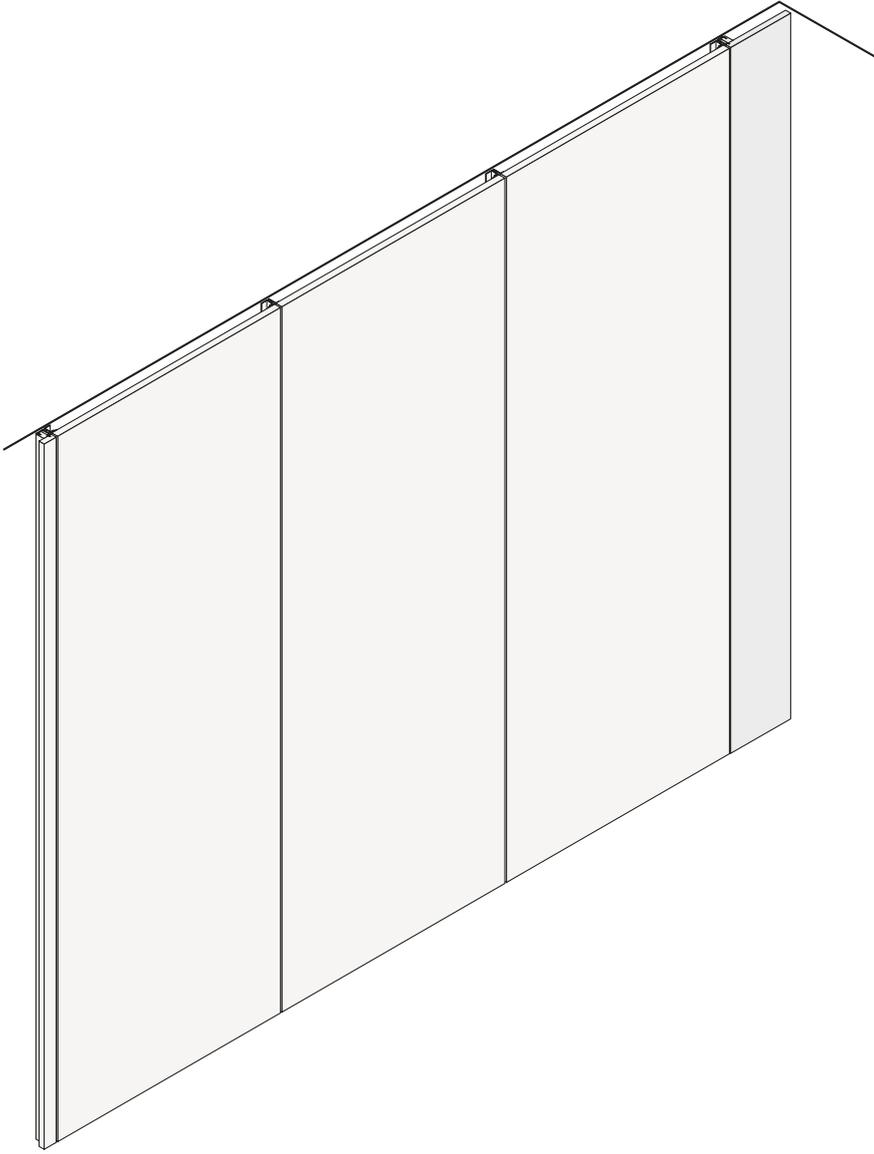

Profilo con cremagliera

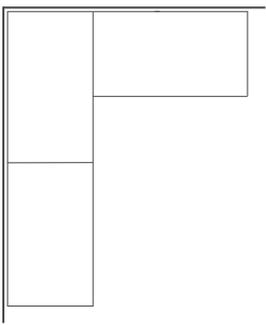

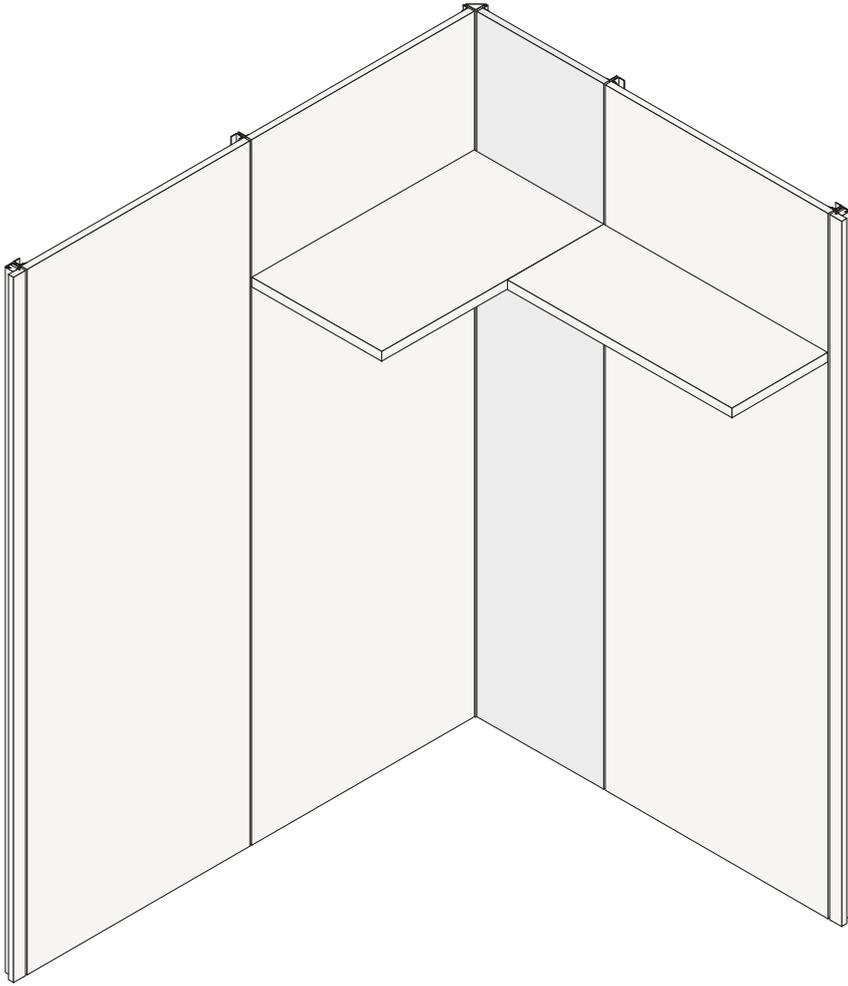

Per cabine armadio senza schienale. Profili in ardesia o champagne opaco da fissare a muro, completi di cremagliera per l'aggancio delle attrezzature.

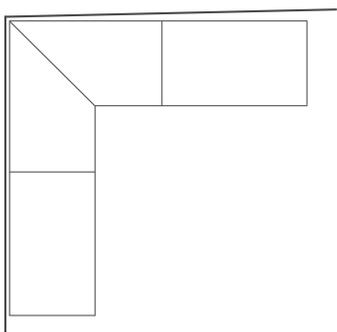

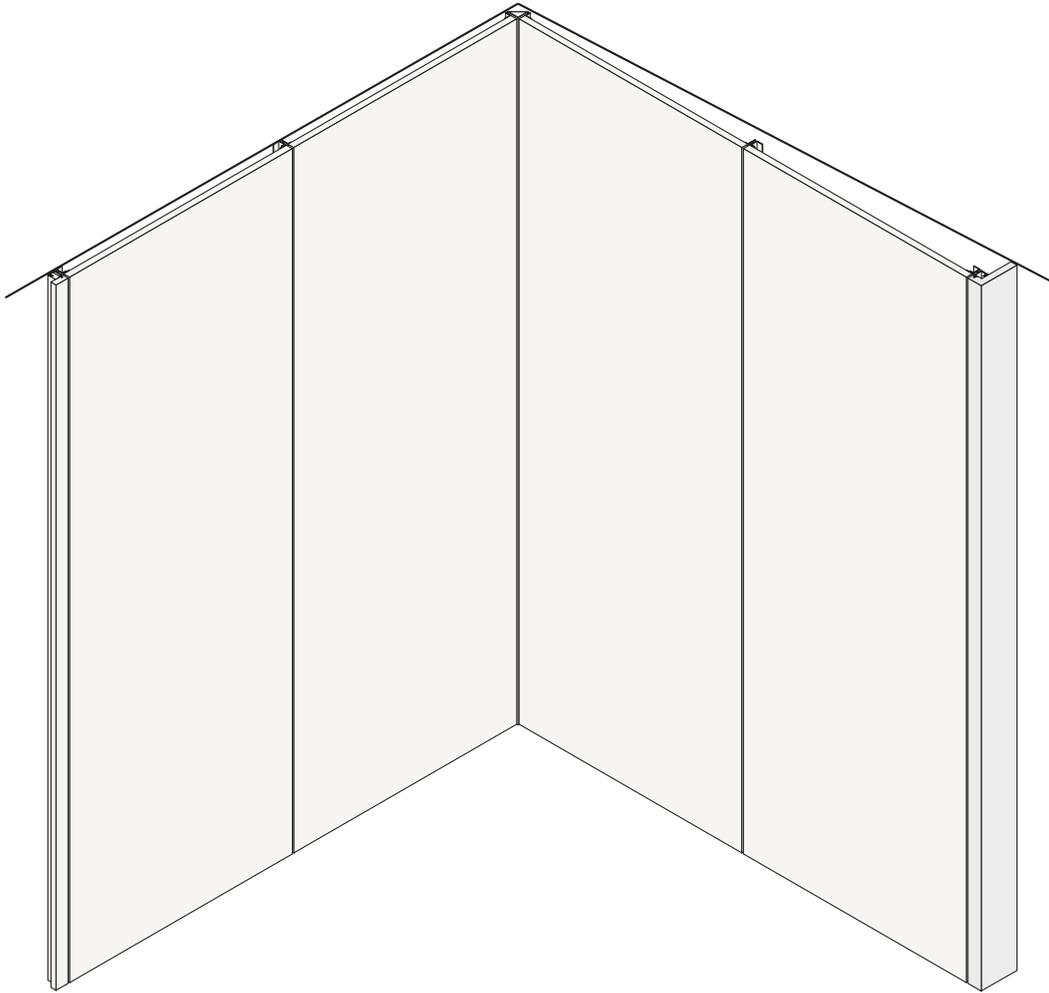

Sono previsti tagli a misura in altezza su pannellature e profili con cremagliera. Le pannellature possono essere ridotte anche in larghezza e per mansardato. Soluzione mansardato non realizzabile con pannellatura schienale in vetro.

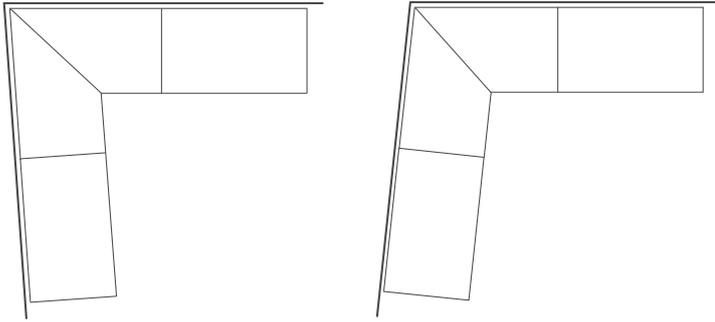

Fascia di aggiustaggio terminale a muro in sostituzione al profilo laterale. Fascia larghezza mm 300 riducibile fino a minimo mm 60.

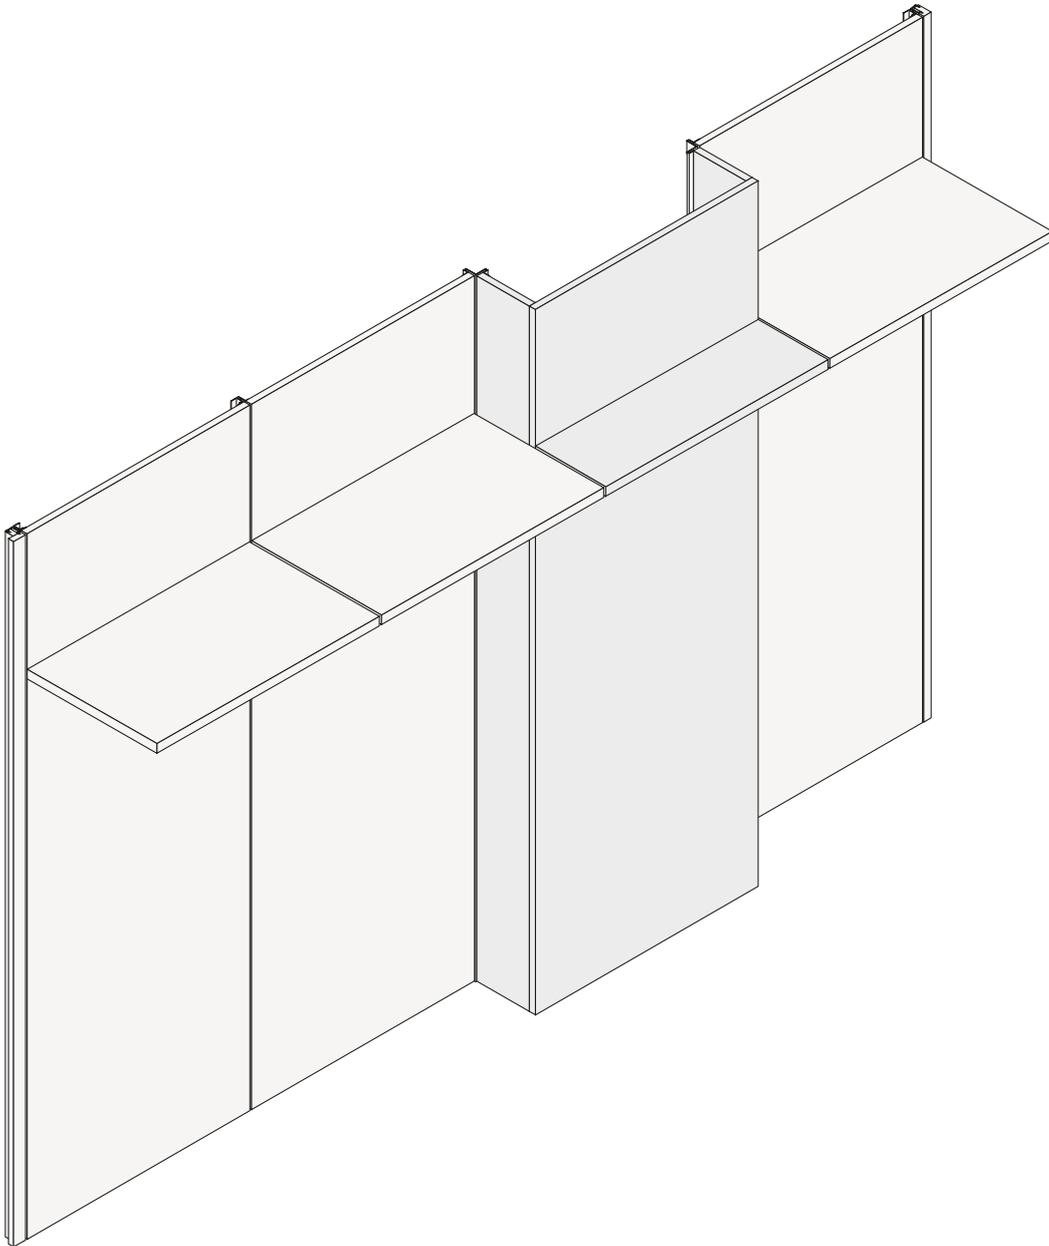

Si possono realizzare composizioni ad angolo con attrezzatura lineare, sia nella versione Ubik con pannellatura a muro che con profili. Per la versione pannellatura a muro si deve prevedere uno schienale angolare con un pannello fuori misura (mm 545 o 400).

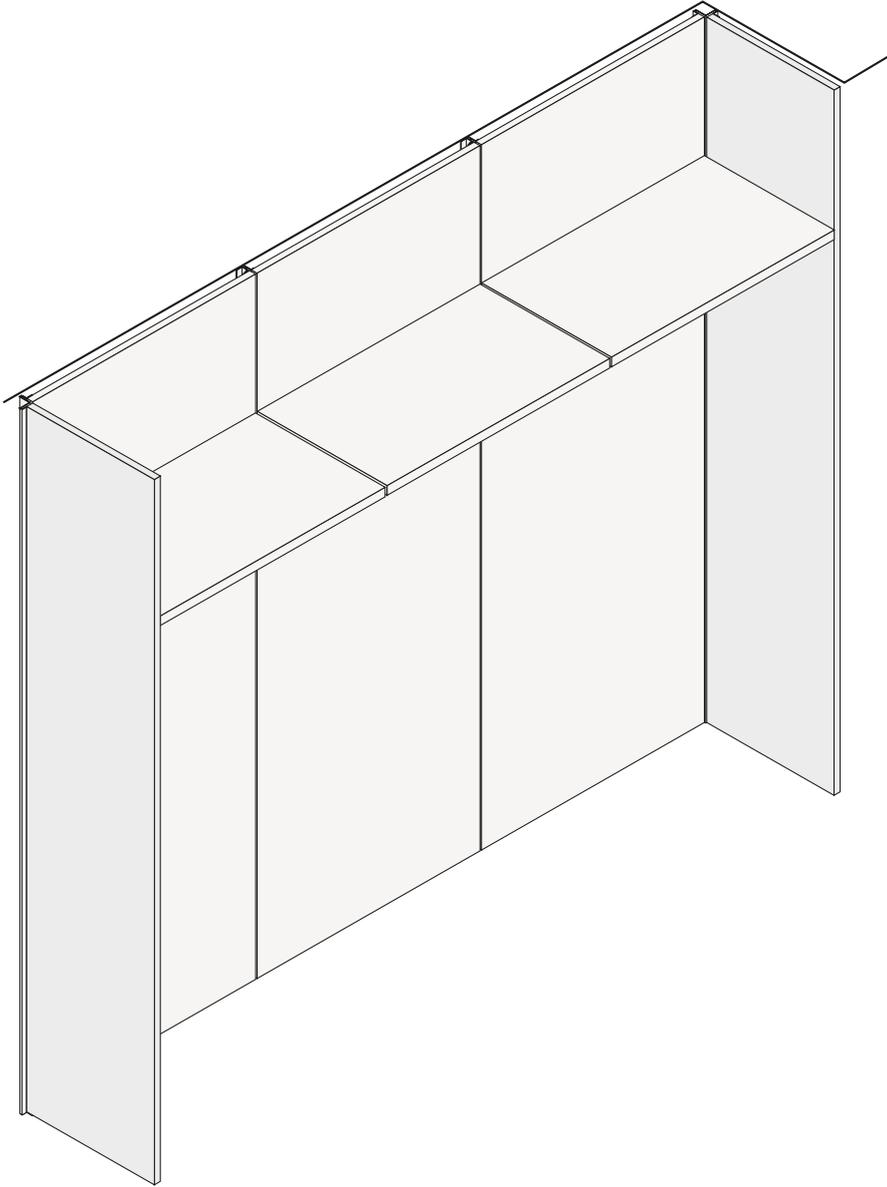

Profilo terminale speciale sx o dx larghezza da mm 52 a 300 e profondità mm 150 riducibile fino a mm 60 da utilizzare per angolazioni muro superiori a 90° (per cabine armadio con pannellatura). L' elemento angolare può essere attrezzato con ripiani (escluso ripiani vetro) e tubi appendiabiti.

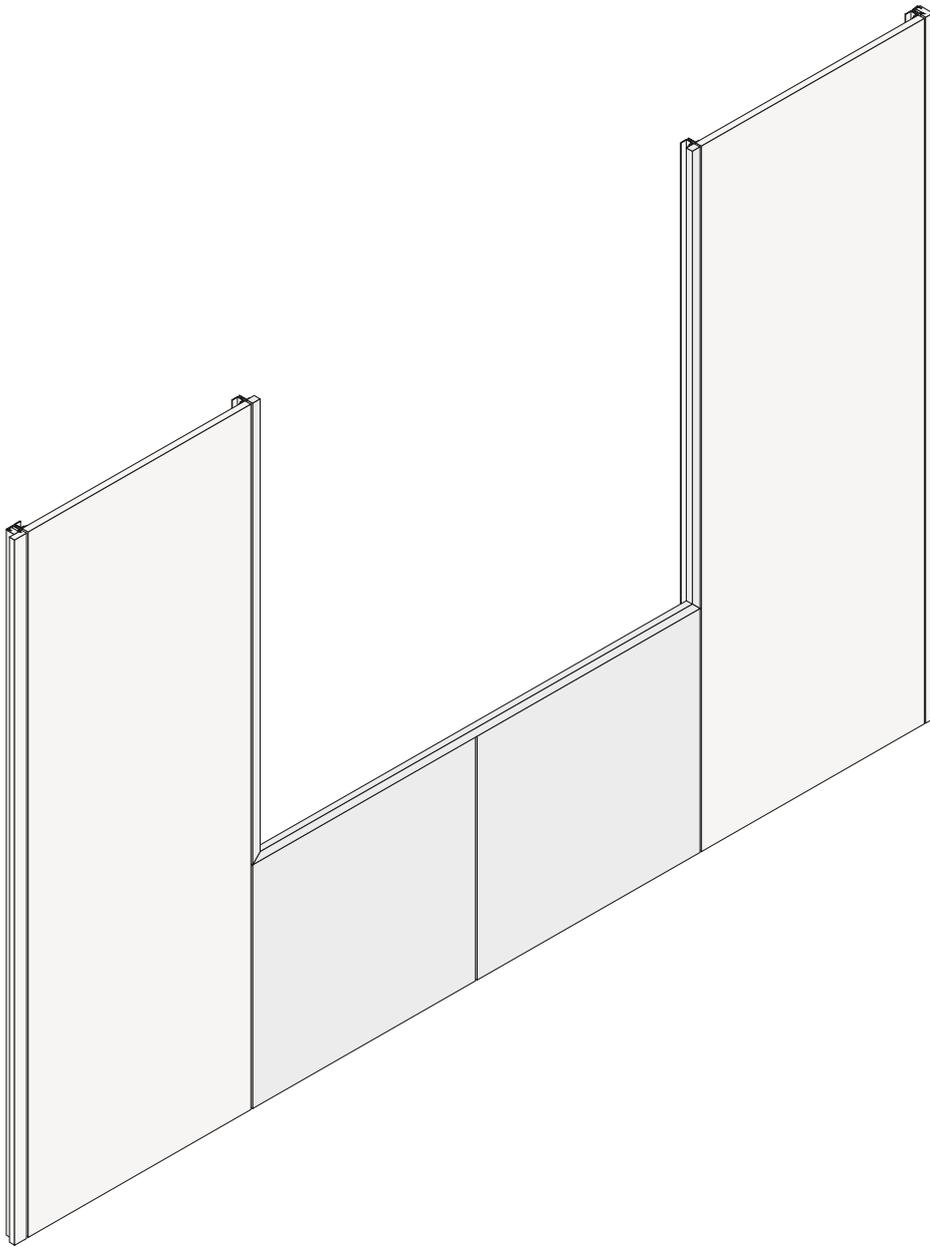

Profilo per angoli fuorisquadra: angolo minimo 85°, angolo massimo 100° (per cabine armadio con pannellatura o con profili con cremagliera). È previsto il taglio a misura per gli elementi che compongono l'angolo fuorisquadra: ripiani e basamento.

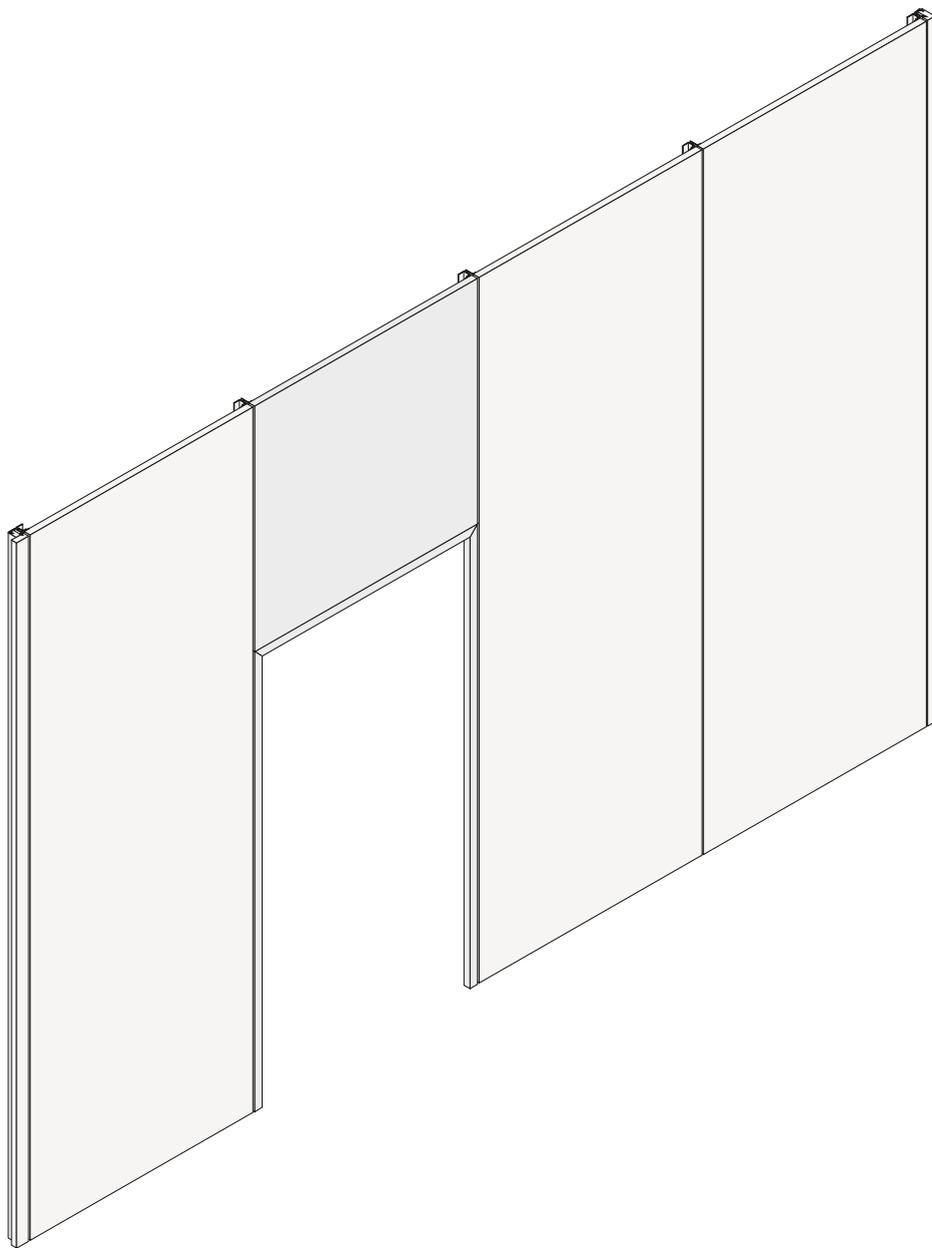

La pannellatura può rivestire un eventuale pilastro. Non realizzabile con pannellatura schienale in vetro.

Si possono realizzare composizioni chiuse lateralmente. Non realizzabile con pannellatura schienale in vetro.

Si possono realizzare composizioni con pannelli centrali ridotti in altezza, ed eventualmente in larghezza, con profilo superiore.

Si possono realizzare composizioni con pannelli centrali ridotti in altezza, ed eventualmente in larghezza, posizionati sospesi con profilo inferiore, per possibile passaggio porta.
