SENZAFINE WALK-IN CLOSET
DIGITAL CATALOGUE

La cabina armadio Senzafine reinterpreta il sistema armadio in modo leggero ed elegante senza rinunciare alla solidità, assicurata dai fianchi più spessi. Senza ante, i volumi di contenimento sono aperti e offrono la massima libertà di configurazione. Le finiture sono protagoniste, così come l'attrezzatura interna, da scegliere in base alle necessità combinando tubi appendiabiti, cassettiere, ripiani e vassoi estraibili.

The Senzafine walk-in closet reinterprets the wardrobe system with a light and elegant approach without sacrificing solidity, ensured by the thicker sides. Without doors, the storage volumes are open and offer maximum configuration freedom. The finishes are the protagonists, as is the internal equipment, to be chosen according to need by combining closet rods, chests of drawers, shelves, and pull-out trays.

SENZAFINE ARMADI E CABINA ARMADIO SENZAFINE WARDROBES AND WALK-IN CLOSET

Un sistema armadi e cabina armadio progettato con una modularità evoluta, in grado di inserirsi in ogni spazio.

La cabina armadio è caratterizzata dai fianchi di spessore mm 35, che ne sottolineano la solidità formale e il rigore geometrico. Il fianco telaio e il fianco telaio vetro (spessore mm 25), permettono di creare armadi e cabine armadio di grande leggerezza formale e di definire composizioni armadio caratterizzate dagli interni "aperti".

Il sistema propone un'organizzazione evoluta degli interni. Sono disponibili fasce di tamponamento orizzontali o verticali, elementi terminali e per composizioni ad angolo, con cambi di profondità, a ponte o con passaggi porta. Sono previsti tagli a misura in larghezza, altezza e profondità.

A wardrobes and a walk-in closet system with a contemporary modularity, suitable to any space.

The walk-in closet is distinguished by vertical panels of 1 1/2" that bring out the solidity of shapes and the geometry. The frame side and the glass frame side (thickness 1") allow to create great formal lightness walk-in closets and to realize wardrobes characterized by inner open units.

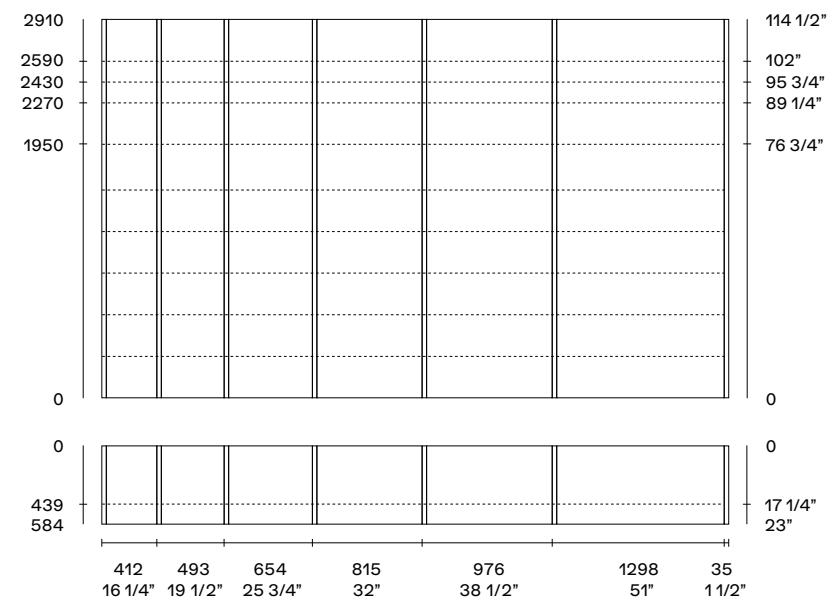

Senzafine system proposes an advanced organization of the internal parts of the cabinets. Horizontal or vertical filler pieces are available, end and corner units, changes in depth, bridge units and door passages. Customizations in width, height and depth are available.
